**ULTRA-SIMPLE, ULTRA-FAST GOODSYNC VERSION 6  
SYNCS ONE MILLION FILES AT ONCE**

*New Version of Siber Systems' Popular Data Synchronization Product Debuts,  
Giving Individuals and Businesses Unparalleled Simplicity and Power*

**FAIRFAX, VA — September 26, 2007** — Siber Systems, Inc., a leading productivity provider, today announced the release of GoodSync Version 6, the latest version of its award-winning data backup and synchronization product. Despite a simplicity and power that has earned it top praise from Computer Shopper, Network World and various other computer magazines and software Web sites, Version 6 has become even faster and easier to use, thanks to a slick new graphic interface and an improved synchronization algorithm proven capable of syncing a million files at once.

GoodSync allows users to synchronize data between any two PCs or storage devices, in any direction. Backups and synchronizations can be accomplished via USB cable, over a home or workplace network, or even the Internet. The highly advanced product automatically detects the latest file changes and deletions regardless of where the changes/deletions exist, then moves them to all other devices involved in the sync—a perfect tool for updating and transferring music, videos, work files, photos or other important information.

**User Convenience, Simplicity**

GoodSync Version 6 adds a number of new features that make it easy enough, yet robust enough for both home and business use. User improvements in Version 6 include:

- A **new tree-based interface** that allows users to more easily view file changes;
- An **improved file status display** that shows files matched, files unmatched and sync direction;
- **Advanced automatic settings** that allow complete set-it-and-forget-it flexibility;
- **Easy job setup** with a tabbed display that facilitates switching between multiple jobs;
- **Improved first time help messages** offered through pop-up balloons;
- An **online, step-by-step tutorial**; and
- Now available in **12 languages**.

“GoodSync has been much heralded for making a complicated task incredibly simple. Yet with Version 6 we’ve pushed the envelope even further,” noted William Carey, vice president of marketing for Siber Systems. “The user interface has just two main options, Analyze and Sync, making our software easy for beginners, yet very robust for advanced users and tasks. Add in the automatic settings, help balloons, an online tutorial, the ability to sync a million files at once, *plus* a free trial offer, and there’s no longer a reason not to get started today syncing and backing up files with our ultra-easy Good Sync Version 6.”

### **Business-Capable**

In addition to its popularity with consumers, many businesses have discovered the enterprise-class backup performance of GoodSync. Version 6 offers a host of features that add to GoodSync's appeal, including automatic settings that enable GoodSync to periodically perform backups throughout the business day without affecting worker productivity.

GoodSync's Mass Install capability allows IT staff to install GoodSync on any number of workstations remotely and in the background. A sync job can also be created and started using the GoodSync command line, allowing tech personnel to easily call GoodSync from batch files as well as from other programs.

To simplify synchronization tasks, syncs can be set to run automatically on logon or logoff using an AutoSync setting; what's more, GoodSync can be set up to automatically save a copy of a file that GoodSync is about to replace when syncing, ensuring that the last two versions of any file are maintained for recovery if needed.

"We're very proud of our new synchronization algorithm, and the ability of GoodSync to sync a million files simultaneously with minimal computer resources," said Vadim Maslov, CEO of Siber Systems. "Our investigation shows that there are no other products currently on the market that can match the performance of our sync algorithm."

### **Pricing, Availability**

Siber Systems' GoodSync data backup and synchronization utility is FREE for personal use; a professional version of the product can be purchased for \$19.95 (USD), with Enterprise and OEM pricing available. GoodSync Version 6 is now available for download or purchase at [www.goodsync.com](http://www.goodsync.com).

### ***About Siber Systems:***

*Founded in 1995, Siber Systems creates and markets a wide range of software to both professional programmers and the general public. The company's three best-known products are RoboForm, RoboForm2Go, and GoodSync. RoboForm, a unique password and identity organizer for PCs and mobile devices, has over two million active users worldwide and is available in both consumer and enterprise versions. RoboForm2Go is a portable version of RoboForm that runs directly from USB flash drives combining convenient and secure password management with complete portability. GoodSync is a powerful, yet easy-to-use file backup and synchronization software. The firm also licenses various data parsing, compilation, and transformation products to major technology companies. Headquartered in Fairfax, Virginia, Siber Systems is privately held.*
